Advanced technology

C·L® technology

For today's light sources!

- Works with dimmable LEDs and incandescent/halogen bulbs—even mixed on the same circuit
- High-performance dimming minimizes problems like flicker, shimmer, and pop-on seen with other dimmers
- HED™ microprocessor technology means compatibility with the broadest range of LEDs available on the market

Clear Connect® RF technology

Wireless that works!

- Lutron invented its first wireless lighting control system in 1993
- Best communications reliability of any wireless lighting system on the market
- Easily meet building codes and standards when paired with Lutron's wireless Radio Powr Savr™ occupancy and daylight sensors
- New patented technology allows for reliable **RF communication with Lutron's complete line of architectural metal wallplates**
