

Lutron sensors make your job easier

Control all load types with a full line of in-wall sensors

PIR sensor switch

PIR dual-circuit sensor switch

C-L® dimmer sensor

0-10V dimmer sensor

Dual-technology sensor switch

Dual-technology, dual-circuit sensor switch

C-L dimmer sensor model
can dim these loads

LED

CFL

Incandescent/
halogen

MLV

ELV

0-10V dimmer sensor model
can dim these loads

LED

Fluorescent

120V Fan*

All sensor switch models can control these loads

*2A PIR sensor switch is for lighting loads only

Easy installation

- Works right out of the box—default settings optimized for most common applications
- Easily adjust settings with no DIP switches or dials
- Miswire protection
- No neutral required

Products that work

- XCT™ sensing technology recognizes the difference between fine human motion and background noise
- Smart ambient light detection learns user's preferred light level and keeps lights off when sufficient daylight is available
- Extended relay lifetime and tamper-resistant lens
